

## How to download program to Microduino through Arduino

1. Take down the Arduino chip

2. Connect five wires

Microduino pin	Arduino pin
5V	5V
GND	GND
RST	REST
RX0	0
TX1	1

3. Make sure the Arduino Uno download driver is installed well.

4. Choose Microduino board and the right COM port, such as selecting

“Microduino Core (Atmega328P@16M,5V)” if you want to download program to

Microduino-Core.

5.Download directly after successful compilation.
